1. PURPOSE

This standard establishes the statewide service capability, Mainframe, as an enterprise service under EA-02 – Establishing an Enterprise Service Policy. WaTech's Mainframe as a Service (MFaaS) brokered model standardizes mainframe hosting and operational support, providing state agencies with access to shared enterprise mainframe computing resources. This service allows state agencies to take advantage of economies of scale and expertise in the mainframe space.

In support of the Mainframe service, WaTech provides 24/7 operations and technical support, high-availability workload processing, data storage/backup, disaster recovery, capacity planning, reporting and performance management, software management, and integration support.

A Washington state agency must not adopt, build, expand, or renew a service with capabilities similar to those in Section 4 unless it has an approved waiver or exemption (see Section 5).

2. SCOPE

In Scope

The Mainframe service must be used by agencies that require mainframe computing for large-scale data processing. WaTech offers infrastructure-based system administration of the Mainframe service.

Out of Scope

Responsibilities associated with applications hosted by agencies are not in scope of this service, including:

- Development and maintenance of agency applications hosted on the Mainframe
- Optimization or performance tuning for agency applications hosted on the Mainframe
- Administration of agency applications hosted on the Mainframe

- Support of agency applications hosted on the Mainframe

3. APPLICABILITY

The scope of this standard applies to all state agencies (as defined in RCW 43.105.020).

This standard does not apply to the K-20 network, institutions of higher education, legislature, judiciary, or local governments.

4. ENTERPRISE SERVICE CAPABILITIES

The Mainframe enterprise service designation encompasses the following capabilities:

- Mainframe infrastructure system administration
- Mainframe operations

5. WAIVERS AND EXEMPTIONS TO THIS STANDARD

In accordance with POL-01-02-S Technology Policy and Standard Waiver Request Standard, agencies may qualify for a waiver from compliance with this standard. No categorical exemptions apply.

6. AUTHORITY

This standard is issued under the authority of RCW 43.105.054, which grants Washington Technology Solutions authority to establish statewide technology standards and enterprise services. RCW 43.105.385 establishes Washington Technology Solutions as a central service provider for state agencies, supporting the delivery of common enterprise technology services. RCW 43.105.450 requires state agencies to comply with statewide information technology security policies and standards.
