Washington State Enterprise IT Policy Office

POL-01-01-PR: IT Policy and Standard Waiver/Exemption Request Procedure

Using the Waiver/Exemption Request Procedure

This Procedure is meant to be used as a companion guide to the Electronic Waiver/Exemption Request Form. It includes some general tips on navigating and routing the form and details on the information you will need to complete the form.

To go directly to the field-by-field description for the type of request you need to submit (Exemption, Initial, Extension or Closure), click the link for the request type in the Table of Contents.

If you have any questions or feedback on the Electronic Waiver/Exemption Request Form or this Procedure, please contact the Enterprise IT Policy Office.

General Information

Save and Resume

When completing a Waiver or Exemption Request Form, you can save your progress at any point to resume later. This is particularly helpful if you need input from multiple subject matter experts for completion of the request.

The *Save and Resume* feature will also make gathering the necessary signatures easier. When you save the form, you will be given the option to email a link to the in-progress form. You can also save the link for sharing. The data will be saved in the linked form for 30 days from the date of creation. Please note that all data entered will be lost after 30 days. To preserve your partially completed form beyond the 30 days, simply create a new link using the *Save and Resume* feature. Once you do this, the previously created link will no longer work.

Note: Most of the fields in the request forms are required. If a field is not required, that will be noted in this guide.

It is possible to navigate through the form without completing the required fields, but all required fields must be completed before submitting. This is an important consideration if your process for collecting signatures is to route the form to the signatories to sign and submit the form.

Collecting Necessary Signatures

The waiver or exemption request form must be signed by the agency head (or the person delegated with signing authority in the Annual Certification) and the CIO (or equivalent). Request forms that are submitted without the required signatures, or with signatures from anyone other than the required parties, will not be accepted.

If both signatories are not able to sign the form together, the *Save and Resume* feature (described above) is a useful feature for collecting signatures asynchronously. To do this, the recommended steps are:

1. Click *Save and Resume* to create a link to the partially completed form.
2. Send the link to the first signatory.

3. After signing, the first signatory must create a new link using the *Save and Resume* feature. **Important:** Creating a new link is the only way to save new data into the form before sharing it electronically.
    - ✓ The first signatory can either email the form (using the email function within the form) or copy the provided link to paste into an email. Note: This can be routed either back to the policy person who is coordinating the request or sent directly to the second signatory.
4. Send the new link to the second signatory.
5. After signing, the second signatory should create a new link to preserve the signature data and route the saved form back to the request coordinator.
    - ✓ Alternatively, the second signatory can submit the form immediately after signing. Please note, however, that if there are any blank required fields, submitting will not be possible until those fields are completed.

Policy Scope and Applicability

Some policies/standards have sections that outline scope and applicability. Over time, these sections will be added to all new policies and standards when they undergo revision.

Scope: The scope section identifies which technology/use cases are in- or out-of-scope of the policy. If a technology or use case is out-of-scope, there is no need to submit a waiver or exemption request.

Applicability: The applicability section details who is required to comply with the policy.

Exemptions

Background

Until recently, there was no option for exemption from policy compliance. All deviation from policy has instead been addressed with time-limited, conditional waivers. In reviewing our waiver metrics, we realized that there are very specific edge cases that were generating a large number of waivers and, due to the specific circumstances, had no clear path to compliance. We have begun examining these use cases more closely and, when appropriate, we are establishing criteria under which exemptions may be issued.

Exemption Process

Tip: If you are not sure whether you meet the criteria for an exemption, you can submit an unsigned exemption request for policy staff to review. If it is determined that an exemption is warranted, you will then be asked to submit a formal, signed exemption request. If an exemption is not an option, you will then need to proceed with a waiver request.

Exemptions will be considered for applications that are in scope of the policy and satisfy the requirements for exemption based on criteria that are specific to each policy/standard. Not all policies/standards offer the option of an exemption. If there are no criteria for exemption listed in the policy, an exemption is not an option for that policy.

If your exemption request is approved, an official letter of exemption will be issued to your agency in the same way waiver letters are currently issued. Additionally, although there will be no ongoing conditions related to an exemption, agencies will be asked to attest to their continued qualification for the exemption in the Annual IT Policy Certification that is due in September of each year. Because the conditions under which exemptions are issued are subject to change, it is necessary to verify continued qualification. For example, if an exemption is issued based on the number of users of a system, that exemption will cease to apply if the number of users grows beyond the number allowed under the exemption criteria.

Form Instructions by Request Type

After providing information about your agency, you will be asked to identify the type of request you are making. The request type options are:

- **Exemption** – Select this option if your agency qualifies for an exemption based on the exemption criteria outlined in the specific policy. For more information, see the Exemptions section in this guide.
- **Initial** – Select this option if your agency does not have a current waiver for the policy for which a waiver is needed.
- **Extension** – Select this option if your agency has a current (active or expired) waiver and needs to extend it due to an inability to reach compliance during the original waiver period. Extensions will be issued at the discretion of the policy owners and State Chief Information Officer and are not guaranteed. We encourage agencies to do their best to achieve compliance within the time frame of the initial waiver.
- **Closure** – Select this option if your agency has a current (active or expired) waiver and compliance, including all conditions, has been met.

Some of the fields in the waiver request form are specific to the request type, so it's important to select the correct option.

Note: This guide is broken out by request type. This allows you to walk through the form field-by-field for the specific request you are submitting. Consequently, there is duplicate information in the guide due to some sections being required for multiple request types.

Request Type: Policy Exemption

Below are the Exemption Request form sections and a description of the information requested in each section.

Section: Agency Information

Information Requested

Agency Name: Choose your agency from the drop-down list. If you do not see your agency listed, please email the policy mailbox.

Agency Head (*not the delegate*): Provide the name, title (e.g., Director, Secretary, etc.), and email address of the agency head (not the delegate).

Agency Policy Contact: This is the person who is responsible for managing waiver and exemption requests for your agency. Provide their name, title and email address.

Alternate Agency Contact: The alternate contact is the person we should communicate with if the primary contact is not available. Provide their name, title and email address.

Section: Request Information

Information Requested

Note: You are currently in the section of the guide for the request type highlighted below.

Request Type: You must select a request type before continuing with the form.

- **Exemption** – Select this option if your agency qualifies for an exemption based on the exemption criteria outlined in the specific policy. For more information, see the Exemptions section in this guide.
- **Initial** – Select this option if your agency does not have a current waiver for the policy for which a waiver is needed.
- **Extension** – Select this option if your agency has and needs to extend a current (active or expired) waiver for the policy for which a waiver is needed.
- **Closure** – Select this option if your agency has a current (active or expired) waiver and compliance, including all conditions, has been met.

Section: Policy Information

Information Requested

Policy Number: Select the policy number for which you are requesting an exemption from the dropdown. If you don't see the correct policy number, or if you have questions regarding this field, please contact the Enterprise IT Policy Office.

Policy Section (if applicable): Some policies are more comprehensive than others, and some contain many numbered sections. If the policy for which you are seeking a waiver addresses a narrow scope, there is no need to fill out this field.

Related Policies: There are some policy issues that span more than one policy. If that is the case, include the related policy number. The form will ask for the policy number and section of the related policy. These are not required fields.

Section: Exemption Request

Information Requested

Existing Waiver: It is important that we know whether you are requesting to convert an existing waiver to an exemption or if your exemption request is new.

If you are converting an existing waiver to an exemption, you will be asked for:

> **Existing Waiver Number:** Often, the original waiver document has a number in the file name (e.g. D-1234). If you do not know the waiver number, indicate that by typing "I don't know" in the answer field.
>
> **Waiver Upload:** You will be asked to upload a copy of the existing waiver that needs to be extended. This is not a required field. It is helpful if you can provide this document, but if you do not have access to a copy of your waiver letter, you can skip this field. Please note, however, that you will need to know the conditions of your original waiver to complete the waiver closure request form.

Based on which criteria is this exemption being requested? You can find the exemption criteria in the Exemptions section of the relevant policy or standard.

Please describe how the exemption criteria are met: Give a brief description of how the criteria are met.

Please provide any additional information to consider when determining qualification for an exemption: This field is optional.

Section: Application / Technology Details

Information Requested

Scope of Request: Is this area of non-compliance related to a single application or due to underlying technology affecting multiple applications?

Options:

Single Application: This option should be selected when the non-compliant issue is related to a single application. For example, a lack of Single Sign-On for a single third-party application.

Underlying Technology: This option should be selected when there is an underlying issue (e.g. improper segmentation in the development environments) that impacts multiple applications. This change was made to eliminate the need for multiple related waivers.

- ***Describe the underlying technology*:** This field is provided so you can explain what the underlying issue is that is affecting multiple applications. Please be specific, but try to avoid including too much extraneous information.
- ***How many applications are impacted by the underlying technology issue*:** This question has two options: *five or less* and *more than five*.
- If there are five or less applications, the form will ask for the application information individually, including:
  - ✓ Application Name
  - ✓ In-house or third-party application
  - ✓ Application Type (e.g., cloud, SaaS, etc.)
  - ✓ Highest category of data involved (Category 1, 2, 3 or 4)

- If there are more than five impacted applications, you will be asked to upload a spreadsheet with a list of the applications. If you upload a spreadsheet, the columns should include the information listed above. You are welcome to include additional columns if it is deemed helpful.

Other: This option should be selected if the policy for which the request is being made is a non-technology specific policy, such as general Disaster Recovery and Security Audit policies. Essentially, this option is useful for any policy where it would not make sense to list out impacted applications. However, if you are seeking a waiver for Disaster Recovery related to a specific technology or application, please select one of the other options.

Section: Associated Review / Oversight

If the waiver request is related to a Security Design/Technology Review (SDR/TR) or a project under oversight, please provide the information when prompted

Information Requested

For waivers or exemptions related to applications or technology that is in SDR or TR:

- ✓ Name of SDR or TR contact
- ✓ Status of SDR (*In Progress, On Hold, Completed*)

For waivers or exemptions related to a project that is currently under WaTech oversight:

- ✓ Project Name
- ✓ Name of Oversight Consultant

Section: List of Contacts for Waiver or Exemption

Information Requested

Please provide the name, title and email address for anyone else (in addition to the waiver contact, alternate contact, agency head and CIO) who should be cc'd on the exemption letter. You will be able to add up to five additional contacts.

Section: Agency Authorization

The exemption request must be signed by the agency head (or authorized delegate identified in the Annual Technology Policy Certification) and CIO (or equivalent). Requests that are submitted without the required signatures will be rejected.

If the request is for an exemption, both signatories will be asked to attest that the agency qualifies for the exemption based on the exemption criteria.

For tips on how to route the request for signatures, see *Save and Resume* and *Collecting Necessary Signatures* in the General Information section of this guide.

Request Type: Initial Waiver

Below are the Initial Request form sections and a description of the information requested in each section.

Section: Agency Information

Information Requested

Agency Name: Choose your agency from the drop-down list. If you do not see your agency listed, please email the policy mailbox.

Agency Head (*not the delegate***):** Provide the name, title (e.g., Director, Secretary, etc.), and email address of the agency head (not the delegate).

Agency Policy Contact: This is the person who is responsible for managing waiver and exemption requests for your agency. Provide their name, title and email address.

Alternate Agency Contact: The alternate contact is the person we should communicate with if the primary contact is not available. Provide their name, title and email address.

Section: Request Information

Information Requested

Note: You are currently in the section of the guide for the request type highlighted below.

Request Type: The options provided are:

- **Exemption** – Select this option if your agency qualifies for an exemption based on the exemption criteria outlined in the specific policy. For more information, see the Exemptions section in this guide.
- **Initial** – Select this option if your agency does not have a current waiver for the policy for which a waiver is needed.
- **Extension** – Select this option if your agency has and needs to extend a current (active or expired) waiver for the policy for which a waiver is needed.
- **Closure** – Select this option if your agency has a current (active or expired) waiver and compliance, including all conditions, has been met.

Section: Policy Information

Information Requested

Policy Number: Select the policy number for which you are requesting an exemption from the dropdown. If you don't see the correct policy number, or if you have questions regarding this field, please contact the Enterprise IT Policy Office.

Policy Section (if applicable): Some policies are more comprehensive than others, and some contain many numbered sections. If the policy for which you are seeking a waiver addresses a narrow scope, there is no need to fill out this field.

Related Policies: There are some policy issues that span more than one policy. If that is the case, include the related policy number. The form will ask for the policy number and section of the related policy. These are not required fields.

Section: Application / Technology Details

Information Requested

Scope of Request: Is this area of non-compliance related to a single application or due to underlying technology affecting multiple applications?

Options:

Single Application: This option should be selected when the non-compliant issue is related to a single application. For example, a lack of Single Sign-On for a single third-party application.

Underlying Technology: This option should be selected when there is an underlying issue (e.g. improper segmentation in the development environments) that impacts multiple applications. This change was made to eliminate the need for multiple related waivers.

- ***Describe the underlying technology*:** This field is provided so you can explain what the underlying issue is that is affecting multiple applications. Please be specific, but try to avoid including too much extraneous information.

- ***How many applications are impacted by the underlying technology issue*:** This question has two options: *five or less* and m*ore than five*.
- If there are five or less applications, the form will ask for the application information individually, including:
  - ✓ Application Name
  - ✓ In-house or third-party application
  - ✓ Application Type (e.g., cloud, SaaS, etc.)
  - ✓ Highest category of data involved (Category 1, 2, 3 or 4)
- If there are more than five impacted applications, you will be asked to upload a spreadsheet with a list of the applications. If you upload a spreadsheet, the columns should include the information listed above. You are welcome to include additional columns if it is deemed helpful.

Other: This option should be selected if the policy for which the request is being made is a non-technology specific policy, such as general Disaster Recovery and Security Audit policies. Essentially, this option is useful for any policy where it would not make sense to list out impacted applications. However, if you are seeking a waiver for Disaster Recovery related to a specific technology or application, please select one of the other options.

Section: Associated Review / Oversight

If the waiver request is related to a Security Design/Technology Review (SDR/TR) or a project under oversight, please provide the information when prompted

Information Requested

For waivers or exemptions related to applications or technology that is in SDR or TR:

- ✓ Name of SDR or TR contact
- ✓ Status of SDR (*In Progress, On Hold, Completed*)

For waivers or exemptions related to a project that is currently under WaTech oversight:

- ✓ Project Name
- ✓ Name of Oversight Consultant

Section: Waiver Questions

Information Requested

When completing these fields, please provide enough detail for policy staff to have a clear understanding of the issue. However, please do not include extensive information that is not directly relevant.

The waiver questions include:

- **Describe the extent of the non-compliance with section(s) identified.**
- **Explain the technical, business or other factors that prevent compliance.**
- **Describe all associated risks that could result from noncompliance.**
- **What mitigations have or will be implemented to address the risks of noncompliance?**
- **Provide the estimated date by which compliance will be achieved.**

Section: Steps to Compliance

Information Requested

Steps required to become compliant will be entered one at a time, with rup to ten steps total. If the number of steps required exceeds ten, a long form field is provided to add additional steps. The information requested for each step includes:

- ✓ The action required for the step to be completed
- ✓ The estimated completion date of that step

Section: List of Contacts for Waiver or Exemption

Information Requested

Please provide the name, title and email address for anyone else (in addition to the waiver contact, alternate contact, agency head and CIO) who should be cc'd on the waiver letter. You can add up to five additional contacts.

Section: Agency Authorization

The waiver request must be signed by the agency head (or authorized delegate identified in the Annual Technology Policy Certification) and CIO (or equivalent). If the request is for a waiver closure, both will be asked to attest that the agency has met all conditions of the waiver and that the agency has achieved compliance with the policy. Requests that are submitted without the required signatures will be rejected.

For tips on how to route the request for signatures, see *Save and Resume* and *Collecting Necessary Signatures* in the General Information section of this guide.

Request Type: Waiver Extension

Below are the Extension Request form sections and a description of the information requested in each section.

Section: Agency Information

Information Requested

Agency Name: Choose your agency from the drop-down list. If you do not see your agency listed, please email the policy mailbox.

Agency Head (*not the delegate***):** Provide the name, title (e.g., Director, Secretary, etc.), and email address of the agency head (not the delegate).

Agency Policy Contact: This is the person who is responsible for managing waiver and exemption requests for your agency. Provide their name, title and email address.

Alternate Agency Contact: The alternate contact is the person we should communicate with if the primary contact is not available. Provide their name, title and email address.

Section: Request Information

Information Requested

Note: You are currently in the section of the guide for the request type highlighted below.

Request Type: The options provided are:

- **Exemption** – Select this option if your agency qualifies for an exemption based on the exemption criteria outlined in the specific policy. For more information, see the Exemptions section in this guide.
- **Initial** – Select this option if your agency does not have a current waiver for the policy for which a waiver is needed.
- **Extension** – Select this option if your agency has and needs to extend a current (active or expired) waiver for the policy for which a waiver is needed.
- **Closure** – Select this option if your agency has a current (active or expired) waiver and compliance, including all conditions, has been met.

Existing Waiver Number: Often, the original waiver document has a number in the file name (e.g. D-1234). If you do not know the waiver number, indicate that by typing "I don't know" in the answer field.

Waiver Upload: You will be asked to upload a copy of the existing waiver that needs to be extended. This is not a required field. It is helpful if you can provide this document, but if you do not have access to a copy of your waiver letter, you can skip this field. Please note that you will need to know the conditions of your original waiver to complete the waiver extension request form.

Section: Policy Information

Information Requested

Policy Number: Select the policy number for which you are requesting an exemption from the dropdown. If you don't see the correct policy number, or if you have questions regarding this field, please contact the Enterprise IT Policy Office.

Policy Section (if applicable): Some policies are more comprehensive than others, and some contain many numbered sections. If the policy for which you are seeking a waiver addresses a narrow scope, there is no need to fill out this field.

Related Policies: There are some policy issues that span more than one policy. If that is the case, include the related policy number. The form will ask for the policy number and section of the related policy. These are not required fields.

Section: Application / Technology Details

Information Requested

Scope of Request: Is this area of non-compliance related to a single application or due to underlying technology affecting multiple applications?

Options for Scope of Request:

Single Application: This option should be selected when the non-compliant issue is related to a single application. For example, a lack of Single Sign-On for a single third-party application.

Underlying Technology: This option should be selected when there is an underlying issue (e.g. improper segmentation in the development environments) that impacts multiple applications. This change was made to eliminate the need for multiple related waivers.

- ***Describe the underlying technology*:** This field is provided so you can explain what the underlying issue is that is affecting multiple applications. Please be specific, but try to avoid including too much extraneous information.
- ***How many applications are impacted by the underlying technology issue*:** This question has two options: f*ive or less* and m*ore than five*.
- If there are five or less applications, the form will ask for the application information individually, including:
  - ✓ Application Name
  - ✓ In-house or third-party application
  - ✓ Application Type (e.g., cloud, SaaS, etc.)
  - ✓ Highest category of data involved (Category 1, 2, 3 or 4)
- If there are more than five impacted applications, you will be asked to upload a spreadsheet with a list of the applications. If you upload a spreadsheet, the columns should include the information listed above. You are welcome to include additional columns if it is deemed helpful.

Other: This option should be selected if the policy for which the request is being made is a non-technology specific policy, such as general Disaster Recovery and Security Audit policies. Essentially, this option is useful for any policy where it would not make sense to list out impacted applications. However, if you are seeking a waiver for Disaster Recovery related to a specific technology or application, please select one of the other options.

Section: Associated Review / Oversight

If the waiver request is related to a Security Design/Technology Review (SDR/TR) or a project under oversight, please provide the information when prompted

Information Requested

For waivers or exemptions related to applications or technology that is in SDR or TR:

- ✓ Name of SDR or TR contact
- ✓ Status of SDR (*In Progress, On Hold, Completed*)

For waivers or exemptions related to a project that is currently under WaTech oversight:

- ✓ Project Name
- ✓ Name of Oversight Consultant

Section: Current Waiver Conditions

To request an extension of a waiver, you will need to provide information about the conditions of your existing waiver.

Information Requested

- ✓ The text of the condition from the original waiver letter
- ✓ The condition due date
- ✓ The status of that condition (Met, Delayed, Expired)
- ✓ If the condition is delayed or expired, you will be asked for the reason.
- ✓ You will be given the option to add another condition, to a maximum of ten conditions.

If your number of conditions exceeds ten (which is very rare), you will be provided with a long text field to add additional condition information.

Section: Waiver Questions

Information Requested

When completing these fields, please provide enough detail for policy staff to have a clear understanding of the issue. However, please do not include extensive information that is not directly relevant.

The waiver questions include:

- **Describe the extent of the non-compliance with section(s) identified.**
- **Explain the technical, business or other factors that prevent compliance.**
- **Describe all associated risks that could result from noncompliance.**
- **What mitigations have or will be implemented to address the risks of noncompliance?**
- **Provide the estimated date by which compliance will be achieved.**

Section: Steps to Compliance

Information Requested

The steps required to become compliant will be entered one at a time, with up to ten steps total. If the number of steps required exceeds ten, a long text field is provided to add additional steps. The information requested for each step includes:

- ✓ The action required for the step to be completed
- ✓ The estimated completion date of that step

Section: List of Contacts for Waiver or Exemption

Information Requested

Please provide the name, title and email address for anyone else (in addition to the waiver contact, alternate contact, agency head and CIO) who should be cc'd on the waiver letter. You will be able to add up to five additional contacts.

Section: Agency Authorization

The waiver request must be signed by the agency head (or authorized delegate identified in the Annual Technology Policy Certification) and CIO (or equivalent). If the request is for a waiver closure, both will be asked to attest that the agency has met all conditions of the waiver and that the agency has achieved compliance with the policy. Requests that are submitted without the required signatures will be rejected.

For tips on how to route the request for signatures, see *Save and Resume* and *Collecting Necessary Signatures* in the General Information section of this guide.

Request Type: Waiver Closure

Below are the Closure Request form sections and a description of the information requested in each section.

Section: Agency Information

Information Requested

Agency Name: Choose your agency from the drop-down list. If you do not see your agency listed, please email the policy mailbox.

Agency Head (*not the delegate***):** Provide the name, title (e.g., Director, Secretary, etc.), and email address of the agency head (not the delegate).

Agency Policy Contact: This is the person who is responsible for managing waiver and exemption requests for your agency. Provide their name, title and email address.

Alternate Agency Contact: The alternate contact is the person we should communicate with if the primary contact is not available. Provide their name, title and email address.

Section: Request Information

Information Requested

Note: You are currently in the section of the guide for the request type highlighted below.

Request Type: The options provided are:

- **Exemption** – Select this option if your agency qualifies for an exemption based on the exemption criteria outlined in the specific policy. For more information, see the Exemptions section in this guide.
- **Initial** – Select this option if your agency does not have a current waiver for the policy for which a waiver is needed.
- **Extension** – Select this option if your agency has and needs to extend a current (active or expired) waiver for the policy for which a waiver is needed.
- **Closure** – Select this option if your agency has a current (active or expired) waiver and compliance, including all conditions, has been met.

Existing Waiver Number: Often, the original waiver document has a number in the file name (e.g. D-1234). If you do not know the waiver number, indicate that by typing "I don't know" in the answer field.

Waiver Upload: You will be asked to upload a copy of the existing waiver that needs to be extended. This is not a required field. It is helpful if you can provide this document, but if you do not have access to a copy of your waiver letter, you can skip this field. Please note, however, that you will need to know the conditions of your original waiver to complete the waiver closure request form.

Section: Policy Information

Information Requested

Policy Number: Select the policy number for which you are requesting an exemption from the dropdown. If you don't see the correct policy number, or if you have questions regarding this field, please contact the Enterprise IT Policy Office.

Policy Section (if applicable): Some policies are more comprehensive than others, and some contain many numbered sections. If the policy for which you are seeking a waiver addresses a narrow scope, there is no need to fill out this field.

Related Policies: There are some policy issues that span more than one policy. If that is the case, include the related policy number. The form will ask for the policy number and section of the related policy. These are not required fields.

Section: Associated Review / Oversight

If the waiver request is related to a Security Design/Technology Review (SDR/TR) or a project under oversight, please provide the information when prompted

Information Requested

For waivers or exemptions related to applications or technology that is in SDR or TR:

- ✓ Name of SDR or TR contact
- ✓ Status of SDR (*In Progress, On Hold, Completed*)

For waivers or exemptions related to a project that is currently under WaTech oversight:

- ✓ Project Name
- ✓ Name of Oversight Consultant

Section: Current Waiver Conditions

To request a closure, you will need to provide information about the conditions of your existing waiver.

Information Requested

- ✓ The text of the condition from the original waiver letter
- ✓ The condition due date
- ✓ The status of that condition (Met, Delayed, Expired)

  Note: To close a waiver, all conditions must be met.
- ✓ You will be given the option to add another condition, to a maximum of ten conditions.

If your number of conditions exceeds ten (which is very rare), you will be provided with a long text field to add additional condition information.

Section: List of Contacts for Waiver or Exemption

Information Requested

Please provide the name, title and email address for anyone else (in addition to the waiver contact, alternate contact, agency head and CIO) who should be cc'd on the waiver letter. You will be able to add up to five additional contacts.

Section: Agency Authorization

The waiver request must be signed by the agency head (or authorized delegate identified in the Annual Technology Policy Certification) and CIO (or equivalent). Requests that are submitted without the required signatures will be rejected.

If the request is for a waiver closure, both signatories will be asked to attest that the agency has met all conditions of the waiver and has achieved compliance with the policy.

For tips on how to route the request for signatures, see *Save and Resume* and *Collecting Necessary Signatures* in the General Information section of this guide.
