Standard ID:	SE-ACCESS-001
Title:	**Building Access Security Standard**
Revision Number:	6
Domain:	Security
Discipline:	Physical access
Effective: **Reviewed:** **Approved by:** **Sponsor:**	11/17/2009 7/20/2022 Chief Information Officer Chief Security Officer

I. Authority, Applicability and Purpose

A. Authority: Title 29 Chapter 90C Delaware Code, §9004C – General Powers, duties and functions of DTI "2) Create, implement and enforce statewide and agency technology solutions, policies, standards and guidelines, including as recommended by the CIO"

B. Applicability: Applies to all State of Delaware communications and computing resources. DTI is an Executive Branch Agency and has no authority over the customers in Legislative and Judicial Branches, as well as Local Education Agencies, and other Federal and Local Government entities that use these resources. However, all users, including these entities, must agree to abide by all policies, standards promulgated by DTI as a condition of funding, and continued use of these resources.

C. Purpose: The purpose of this standard is to establish consistency in both the quality and the security of building access controls for State of Delaware facilities except school districts and correctional/security facilities. It will meet the needs of the Division of Capitol Police regarding building access, occupant identification and emergency access.

II. Scope

A. Audience: This document is intended for IT personnel in State facilities, except school districts, who are responsible implementing security mechanisms for buildings.

B. Applicability: This standard will cover all State facilities except school districts and correctional/security facilities.

C. **Areas Covered:** This standard will address the type of cards to be used for secure access to State facilities except school districts and correctional/security facilities. Also, it will address the type of building security management system to be deployed in State facilities except school districts and correctional/security facilities.

D. **Environments:** With the exception of school districts and correctional/security facilities, building access controls will be deployed in all State facilities that require restricted or managed access.

III. Process

A. **Adoption:** These standards have been adopted by the Department of Technology and Information (DTI) through the Technology and Architecture Standards Committee (TASC) and are applicable to all Information Technology use throughout the State of Delaware.

B. **Revision:** Technology is constantly evolving; therefore the standards will need to be regularly reviewed. It is the intent of the TASC to review each standard annually. The TASC is open to suggestions and comments from knowledgeable individuals within the state, although we ask that they be channeled through your Information Resource Manager (IRM).

C. **Contractors:** Contractors or other third parties are required to comply with these standards when proposing technology solutions to DTI or other state entities. Failure to do so could result in rejection of the proposed technology solution. For further guidance, or to seek review of a component that is not rated below, contact the TASC at dti_tasc@delaware.gov.

D. **Implementation responsibility:** DTI and/or the organization's technical staff will implement this standard during the course of normal business activities, including business case review, architectural review, project execution and the design, development, or support of systems.

E. **Enforcement:** DTI will enforce this standard during the course of normal business activities, including business case and architectural review of proposed projects and during the design, development, or support of systems. This standard may also be enforced by others during the course of their normal business activities, including audits and design reviews.

F. **Contact us:** Any questions or comments should be directed to dti_tasc@delaware.gov.

IV. Definitions/Declarations

A. Definitions

1. **Contactless card:** A smart card that uses radio frequencies to exchange information. Unlike a contact card, it needs no physical contact to be read by readers or terminals. Containing an embedded integrated circuit known as a "contactless chip," the card needs only to be waved near a reader to record transactions or to identify the user. Contactless-card systems are either passive, with the readers generating the frequency, or active, in which the card activates the reader.[1]

[1] Gartner, Inc -- http://www.gartner.com/6_help/glossary/GlossaryMain.jsp

2. **Corporate 1000 Program:** The Corporate 1000 Program card numbering scheme allows for a card format that is developed specifically for each individual end-user customer. Card numbers are tracked in the manufacturing process to ensure that card numbers are not duplicated.

B. Declarations

1. Must support a 13.56Mhz contactless card
2. Must be a part of the **Corporate 1000 Program**.

V. Definition of Ratings

COMPONENT RATING	USAGE NOTES
STANDARD – DTI offers internal support and/or has arranged for external vendor support as well (where applicable). DTI believes the component is robust and solidly positioned in its product life cycle.	These components can be used without explicit DTI approval for both **new projects** and **enhancement** of existing systems.
DECLINING – Deprecated - DTI considers the component to be a likely candidate to have support discontinued in the near future. A deprecated element is one becoming invalid or obsolete.	Via the State's waiver process, these components must be explicitly approved by DTI for **all projects**. They must not be used for **minor enhancement** and **system maintenance** without explicit DTI approval via the State's waiver process.
DISALLOWED – DTI declares the component to be unacceptable for use and will actively intervene to disallow its use when discovered.	No waiver requests for new solutions with this component rating will be considered.

Missing Components – No conclusions should be inferred if a specific component is not listed. Instead, contact the TASC to obtain further information.

VI. Component Assessments

Component	Rating	Comments
Building Access Security Card		
HID Proximity 125kHz	Disallowed	Acceptable only for organizations with existing readers that accept ONLY HID Proximity 125kHz cards. Agencies must take initiative to replace these cards as they are a security risk. Time is of the essence. 125KHz technology is being phased out. **Must be a part of the Corporate 1000 program.**
iCLASS® 13.56MHz	Standard	iCLASS technology only or multi-technology form factor with HID 125kHz proximity. Multi-technology cards should be used for organizations that still have 125kHz card readers. This enables future migrations to the more secure iCLASS readers without needing to re-purchase cards/credentials. New installations must include encryption from the access card to the card reader, the hardware control panel and finally the server. **Must be a part of the Corporate 1000 program.**
Any card NOT purchased through the State of Delaware Corporate 1000 program	Disallowed	Cards purchased through the State of Delaware Corporate 1000 program ensure no duplication of credentials.
Combination Physical and Logical Access Cards		
Crescendo	Standard	To be used when a single card for logical and physical access is required. **Must be a part of the Corporate 1000 program.**
Card Readers		
iCLASS SE or MultiCLASS SE	Standard	Must be compatible with the existing cards. SE readers can be field upgraded to support future SEOS technology while still backwards compatible.
Proximity 125KHz	Disallowed	Phasing out 125KHz cards
Building Security Management System		

Pro-Watch®	Standard	Authorized Pro-Watch® vendors in Delaware can be found on this website by searching for contract number GSS19599-BLDG_SECURE

VII. Development and Revision History

Date	Revision
9/29/2019	Rev 5 – Current version
7/20/2022	Rev 6 – Updated card technologies as needed
11/1/2024	Rev 6 - Removed references to the Technology Investment Council and added a clarification in the Process section
