TS-DBS-008: Database User Administration

Document ID	TS-DBS-008
Title	Database User Administration
Executive Sponsor	Database Services Management, DBS Manager
Issuing Authority	Governor's Office of Information Technology (OIT)
Applies to	OIT and OIT supported agencies; OIT DBS database administrators, OIT System administrators, and database users.
Instrument Type	Standard
Version	4.0
Effective Date	05-18-2021
Last Updated	07-01-2026

Purpose

This standard is issued under the authority of the Governor's Office of Information Technology (OIT)(C.R.S. 24-37.5, et seq.), Office of Enterprise Architecture (Rule 8 CCR 1501-7).

Scope

These standards apply to OIT and OIT supported agencies. This Standard shall be used by employees of OIT, agencies supported by OIT, and vendors contracted by OIT or its stakeholders, as a means to enforce technology standardization and assist in making the usage, support, and/or purchase of technologies more consistent and efficient.

The standards assigned and prescribed by this document, instituted for use by the approval of the OIT Architecture Review Board (ARB), should be used to govern purchase and deployment decisions deemed as “go-forward” or “net-new” strategies or implementations, and are not intended for use as retroactively enforceable mandate or policy for immediate conformance (especially in cases where cost implications may be prohibitive). This standard shall in no way require OIT to support any products and services not approved by OIT.

These standards apply to OIT and OIT supported agencies. They are to be used by OIT DBS database administrators, OIT System administrators and database users.

Roles and Responsibilities

Enterprise Architecture - Chief Enterprise Architect

- Chairs and conducts business of the Architecture Review Board (ARB).
- Update effective date and/or last review date.

- Publish the ARB approved Standard to the OIT public facing website.

Architecture Review Board (ARB)

- Engage stakeholders and subject matter experts to determine standard.
- Review/Approve Standard (this document).

Database Services Management - DBS Manager

- Owner of Standard.
- Engage stakeholders and subject matter experts to determine standard.
- Update document standards and version number.
- Present to the Architecture Review Board for approval and adoption.

Additional Assignments

All OIT staff are responsible to be aware of the existence of this (and all) standard(s) and its purposes of authority and governance in support of OIT's statutorily mandated mission in service of Colorado State Government affairs.

DBS

- Performs user administration on database platforms supported by DBS.

Business Application Owner

- Provides DBS with predefined user access requirements.

Database User

- Requests access for data or functionality to perform their job duties.

Standards

User Account Administration

- Only OIT DBS database administrators will administer database user accounts.
- Production database access will be granted upon receipt of service tickets from IAM.
- Non-production database access will be granted upon receipt of service tickets.
- User accounts will be password protected.
- User accounts will be audited periodically.

Exceptions and Variance

Requests for variances from any provisions with this Standard must be requested using the Technical Standard End User Exception Request Procedure.

The purpose of the Exception Request process is to address business or technical reasons for the inability to adhere to one or more requirements in this standard.

Requests for exceptions should include compensating controls, that is, processes, technologies, or procedures proposed used to mitigate any deviation from the standard requirement. The Secure Configuration Exception Request form must be submitted to oit_ciso@state.co.us. Exception requests will be processed and recommended for approval, conditional approval, or denial.

Definitions

Standard: A rule that specifies a particular course of action or response to a given situation. Standards are mandatory directives to carry out management's policies and are used to measure compliance with policies. Standards serve as specifications for the implementation of policies and are designed to promote implementation of high-level organization policy rather than to create new policy in themselves.

Business Application Owner: The entity responsible for the business delivery of services, application functionality, and is the custodian of the application data.

Least Privilege & Zero Trust: Users and applications have the minimal privileges access to data they require to function properly.

Database User: Unique identifier that accesses the database.

DBS: OIT Database Services group

OEA (Office of Enterprise Architecture): The Office of Enterprise Architecture was formed as an office under OIT by Governor's Rule 8 CCR 1501-7.

OIT (Office of Information Technology): The Governor's Office of Information Technology was created and governed by C.R.S. 24-37.5, et seq.

Exception request: A document requesting an exception to a recognized standard, requiring a business or technical justification for granting the exception. Typically an exception request is subject to review and approval by an authority in the area.
