TS-INF-011: Infrastructure Operations Technology Standards

Document ID	TS-INF-011
Title	Infrastructure Operations Technology Standards
Executive Sponsor	Infrastructure Operations, Manager
Issuing Authority	Office of Information Technology (OIT)
Applies to	OIT and OIT-supported agencies, employees of OIT, agencies supported by OIT, and vendors contracted by OIT or its stakeholders.
Tier	Standard
Version	4.0
Effective Date	08/11/2022
Last Updated	06/26/2026

1. Purpose

OIT is statutorily mandated to provide IT support and services to the State and its stakeholders in the most effective and efficient manner possible (as defined by C.R.S. 24-37.5). To satisfy stakeholder needs surrounding supported technology standards, this document is submitted as the standard for technology specifications to provide the service.

The ultimate purpose of this standard is to describe the minimum requirements for designing, installing, securing, monitoring, maintaining, protecting, and decommissioning technology provided by the OIT Infrastructure Operations Group.

2. Scope

These standards apply to OIT and OIT-supported agencies. This standard shall be used by employees of OIT, agencies supported by OIT, and vendors contracted by OIT or its stakeholders, as a means to enforce technology standardization and assist in making the usage, support, and/or purchase of technologies more consistent and efficient.

Standards instituted for use by approval of the OIT Architecture Review Board (ARB) govern purchase and deployment decisions deemed "go-forward" or "net-new", and are not intended as a retroactively enforceable mandate for immediate conformance, especially where cost implications may be prohibitive.

3. Roles and Responsibilities

Enterprise Architecture - Chief Enterprise Architect

- Chairs and conducts business of the Architecture Review Board (ARB).
- Updates effective date and/or last review date.
- Publishes the ARB-approved Standard to the OIT public-facing website.

Architecture Review Board (ARB)

- Engages stakeholders and subject matter experts to determine the standard.
- Reviews and approves the Standard (this document).

Chief Information Security Office

- Engages stakeholders and subject matter experts to inform the standard.

Infrastructure Operations - Manager

- Owner of Standard; engages stakeholders and subject matter experts to determine the standard.
- Updates document standards and version number; presents to the Architecture Review Board for approval and adoption.

All OIT staff are responsible for being aware of the existence of this (and all) standard(s) and its purposes of authority and governance in support of OIT's statutorily mandated mission in service of Colorado State Government affairs.

4. Standards

The IAW Technology Standards spreadsheet lists each Technology Category and all the standard supported products that each group is responsible for supporting and maintaining. Refer to that spreadsheet for the current list of approved technology standards across all Infrastructure Operations categories.

5. Variance and Exception Process

Any request to procure or deploy technology that is a variance to the standards and provisions stated within this document must be requested of, and approved by, the "Owner of Standard" listed under Roles and Responsibilities.

Requests may be acquired by completing the "EXCEPTION REQUEST to Technical Standard" form and including the completed form (with all signatures) along with other documentation required as part of standard procedures when executing a technology procurement or service deployment.

7. Definitions

Future: Evaluated as a future standard.

Maintain: Deprecated; support will end within 18 months.

No support: Unsupported by OIT.

Standard: A rule that specifies a particular course of action or response to a given situation. Standards are mandatory directives to carry out management's policies and are used to measure compliance with policies.

OEA (Office of Enterprise Architecture): Formed as an office under OIT by Governor's Rule 8 CCR 1501-7.

OIT (Office of Information Technology): Created and governed by C.R.S. 24-37.5, et seq.

Exception request: A document requesting an exception to a recognized standard, requiring a business or technical justification for granting the exception, subject to review and approval by an authority in the area.
