Business Intelligence Policy

Effective Date:
November 18, 2025

Category:
Information

Scheduled Review:
November 2026

1. Authority

Executive Order 2016-06, Enterprise Information Technology Governance

2. Document Control

This document replaces, in its entirety, the *Business Intelligence Policy*, dated January 6, 2025.

3. Purpose

This Information Technology Policy (ITP) establishes the enterprise-wide policy and standards for Business Intelligence (BI) infrastructure, reporting, and dashboards.

4. Scope

This policy applies to all offices, departments, boards, commissions, and councils under the Governor's jurisdiction and any other entity connecting to the Commonwealth Network (hereinafter referred to as "agencies").

5. Policy

For definitions of terms found within this document, refer to the *IT Policy Glossary*.

This policy treats BI separately from data warehousing. (For Data warehousing see the *Data Management Policy*).

Reports or Dashboards that are part of out-of-the-box application functionality and are not leveraging separate BI analytics solutions are not in the scope of this policy.

Agencies shall coordinate with the Office of Administration, Office for Information Technology (OA/IT) to ensure that all Business Intelligence (BI) solutions, reports, and dashboards are implemented with comprehensive security and process controls that uphold the confidentiality, integrity, and availability of data in accordance with the data owner's requirements. This includes conducting thorough security requirement analyses, applying appropriate security controls, and ensuring that all users are appropriately authenticated and authorized.

Access to BI reports, dashboards, and data sources must be restricted to only those users who are entitled to view them. In instances where authentication is required for BI implementation, Agencies shall leverage the enterprise access management solutions as outlined in the *Access Management Policy*.

Agencies shall coordinate with their Agency Chief Counsel and OA/IT to ensure all BI solution, report, and dashboard implementations comply with all applicable statutes, laws, regulations, privacy requirements, and policies.

Agencies requiring BI solutions, reports, or dashboards shall use one of the current standards as defined in *Business Intelligence Standards*.

Agencies shall not produce BI reports or dashboards for public consumption that contain personally identifiable information or other closed records as documented in the *Data Classification Policy.*

Agencies shall ensure only the data required for their business process is collected and retained per the agency record retention plan.

Agencies shall review and update their Agency records retention plan with every implementation of BI Reporting in accordance with *Management Directive 210.5 Amended, The Commonwealth of Pennsylvania State Records Management Program.*

In the implementation of a reporting solution, application performance and operational database server utilization shall be analyzed for current and anticipated future levels to determine if the reporting solution requires a dedicated data store.

For BI solutions that have AI integrations or capabilities, agencies shall refer to the *Artificial Intelligence Policy*.

Additionally, Agencies shall ensure:

- Applications leveraging a BI Dashboard provide consistent data and metadata for KPIs or Metrics.
- Data that supports the KPIs or Metrics displayed in BI Dashboards are synchronized with the underlying detail data that is used for drill-down analysis.
- BI Dashboard implementations comply with any applicable data suppression requirements.

6. Contact

Questions or comments may be directed via email to OA, IT Policy.

7. Exception from Policy

In the event an agency chooses to seek an exception from this Standard, a request for an exception shall be submitted via the enterprise IT Policy Exception process. Refer to *IT Policy Governance Policy* for guidance.

8. Revision History

This chart contains a history of this publication's revisions. Redline documents outline the revisions and are available to Commonwealth users only during the drafting process.

Version	Date	Purpose of Revision
Original	01/06/2025	Base Document
Revision	11/18/2025	Consolidated policy language and removed any duplicative requirements Added reference to the AI Policy for BI solutions that have AI integrations
