AGENCY CONTROLLED INFORMATION TECHNOLOGY (IT) CHANGE MANAGEMENT AND MAINTENANCE

WyIT - 1001

PURPOSE: To ensure agencies managing internal IT infrastructure maintain an IT change management practice; minimizing risk to agency business and maintaining compliance with statewide security policies, standards, and procedures.

I. APPLICABILITY

This policy applies to all Executive Branch agencies, boards, and commissions staff (collectively referred to as "agencies"). This policy is also applicable to consultants, affiliates, and temporary employees.

II. DEFINITIONS

All definitions for this policy are located in the Policy Dictionary.

III. EXCEPTIONS

Any exceptions provided to the following policy must abide by WyIT - 3002 - Security Exception Request policy.

IV. CHANGE MANAGEMENT

A. Requirements

- Must establish a process for change management for IT operations and services to ensure requested changes are thoroughly checked and assessed technically and from a business perspective. The process should include:
  - Change classification types with varying response levels.

    - Defined roles and responsibilities for participants.
    - Procedure process workflow.
    - Key performance indicators of success or failure.
- One-week notice to ETS is required for all changes. The notice must include:
    - Change description,
    - Point of contact, and
    - Time of execution.

Email notice should be emailed to the distribution group ets-change@wyo.gov.

V. MAINTENANCE REQUIREMENTS

A. Agency Controlled Maintenance

- Schedule, perform, document, and review maintenance records of maintenance on technology components according to manufacturer or vendor specifications and requirements.
- System owners are required to explicitly approve the removal of the information system or system components from facilities for off-site maintenance or repairs. Equipment must be sanitized prior to removal.
- Following maintenance, check all potentially impacted security controls to verify that they are still functioning properly following maintenance or repair actions.

B. Vendor Controlled Maintenance

- Monitor and retain all affiliate-provided maintenance and diagnostic activities.
- Allow the use of affiliate diagnostic tools as consistent with policy and documented in the security plan for the information system.
- Employ strong authenticators in the establishment of affiliate maintenance and diagnostic sessions.
- Terminate session and network connections when affiliate maintenance is completed.
- Document the security plan for the information system, the policies and procedures for the establishment and use of affiliate maintenance and diagnostic connections.

VI. PERSONNEL REQUIREMENTS

A. Establish a process for authorizing maintenance personnel authorization.

B. Maintain a current list of authorized personnel available to ETS upon request.

C. Ensure non-escorted personnel performing maintenance have required access authorizations.

D. Designate personnel with required access authorizations and technical competence to supervise the maintenance activities of personnel who do not possess required access authorizations.
