OPR: WVOT Cybersecurity

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

Publications are available online at
https://sites.google.com/wv.gov/othub/policy-governance/ot-policies

Questions and change recommendations related to this publication shall be directed to this publication's Office of Primary Responsibility (OPR). This policy shall be reviewed annually to ensure continued alignment with current legal, operational, and strategic requirements. Revisions will be undertaken as necessary.

SUMMARY OF VERSIONS AND CHANGES

Version	Date	Revision Description
1	07/01/2015	Added Change Log History, Split 4.5 into 4.5 & 4.6
2	09/01/2016	Reviewed - No Changes
3	10/20/2017	Reviewed - No Changes
4	12/31/2023	Updated website link
5	DRAFT	Reformated and renamed from WVOT Backbone Monitoring to Network Monitoring Policy

1. PURPOSE

1.1. This policy establishes the West Virginia Office of Technology (WVOT) requirements regarding the monitoring and logging of network traffic that traverses the WVOT Network Backbone. The goal of monitoring is to maintain the integrity and security of the State's network infrastructure and information assets. Any inspection of electronic data, and any action performed following such inspection, will be governed by all applicable federal and state statutes and by WVOT policies and procedures.

2. SCOPE

2.1. This policy applies to all departments (including agencies, boards, authorities, and commissions) within the Executive Branch of WV State Government, as well as any user, device, and/or agency connected to the WVOT network backbone.

2.2. Where there are policies in place which provide less restrictions or security than this policy, those policies will be superseded by this policy. In instances where existing state and federal laws, regulations, and policies are more restrictive, the more restrictive provisions will prevail.

3. POLICY

3.1. Backbone network traffic will be monitored for the improper release of confidential information, intruder detection, and other security or policy violations.

3.2. Personnel authorized to analyze the network backbone will not disclose any information reviewed in the process without approval of the Chief Information Officer (CIO) or Chief Information Security Officer (CISO), and the appropriate agency authority, when appropriate.

3.3. Only the Security Operations Center (SOC) and Networking teams in the WVOT are authorized to routinely monitor traffic. Authorization for ad hoc monitoring may be granted to others in writing by the CIO or CISO.

3.4. Authorized staff shall use network monitoring devices only to detect:

3.4.1. patterns of attack or compromise;

3.4.2. unauthorized release of data;

3.4.3. to troubleshoot and analyze network-based problems.

3.4.4. to detect and investigate anomalous network activity

3.5. The scope of all monitoring shall be restricted only to that necessary for the fulfillment of security and network operation duties.

3.6. Monitoring data stores and logs will not be accessible from the public Internet. All personnel will show due care to data in compliance with the WVOT Data Classification Policy's requirements for protection, handling, and storage.

3.7. All requests for monitoring assistance from agencies shall be coordinated through the Cybersecurity Office.

4. POLICY SPECIFIC DEFINITIONS

4.1. Chief Information Officer (CIO) - the person designated by the governor to lead the WV Office of Technology and oversee information technology practices and initiatives for the Executive Brand of WV State government, excluding the constitutional officers.

4.2. Chief Information Security Officer (CISO) - Person designated by the CTO to oversee information security practices and initiatives for the Executive Branch of WV State government, excluding the constitutional officers.

4.3. Confidential Data – Information that is legally protected (e.g: Protected Health Information) or otherwise deemed by a qualified expert to be unsuitable for open access.

4.4. Information Resources – Any information in electronic, audio-visual or physical form, or any hardware or software that makes possible the storage and use of information.

4.5. Network Backbone – The physical and electronic network infrastructure, currently under the operational administration of the WVOT.

4.6. Office of Primary Responsibility (OPR) - The primary section within WVOT that takes the lead on a specific policy or procedure. Usually the WVOT service provider/owner that the policy is related to or governs.

4.7. SOC – Security Operations Center. WVOT work unit responsible for monitoring the security of the Network Backbone.

4.8. EOC – Enterprise Operations Center. WVOT work unit responsible for monitoring the health of the Network Backbone.

4.9. Subject Matter Expert(SME) - Someone with extensive, specialized knowledge and experience in a particular area, process, or topic.

4.10. West Virginia Office of Technology (WVOT) - The division of the Department of Administration established by WV Code § 5A-6-4a, et. seq., which is led by the State's CIO and designated to acquire, operate, and maintain the State's technology infrastructure. The WVOT is responsible for evaluating equipment and services, and reviewing information technology contracts.
