ARTIFICIAL INTELLIGENCE USAGE AND CODING

WyIT 1005

PURPOSE: The purpose of this policy is to establish minimum mandatory expectations for the responsible and ethical use of Artificial Intelligence (AI) within the State of Wyoming for Code Generation and support.

I. APPLICABILITY

This policy applies to all Executive Branch agencies, boards and commissions staff (collectively referred to as 'agencies). This policy is also applicable to consultants, affiliates and temporary employees.

II. DEFINITIONS

All definitions for this policy are located in the Policy Dictionary.

III. EXCEPTIONS

Any exceptions provided to the following policy must abide by the WyIT 3002, Security Exception Request policy.

IV. ACCEPTABLE USE

A. For Generative Artificial Intelligence (GenAI) Acceptable Use refer to WyIT 3023, Generative Artificial Intelligence Acceptable Use.

V. CODE GENERATION AND SUPPORT

A. Developers are accountable for all computer code generated using GenAI. All code must adhere to existing coding standards and practices. (WyIT 3025,

Source Control Policy)

B. Developers must keep detailed records regarding the use of GenAI for all AI used for projects. This documentation should contain the user, name of the project, and manner of usage to help track effectiveness and ensure compliance with WyIT 3023, Generative Artificial Intelligence Acceptable Use.

C. Developers must verify that GenAI code does not introduce security risks, and aligns with project requirements, as if it were manually written code.

D. Developers must track the quality of GenAI's code and its impact on productivity. They must also address any issues or limitations that arise.

E. Developers must test and validate all GenAI code.

F. Developers must ensure the GenAI is robust, secure, and subject to controls, as well as appropriate technical and organizational measures to monitor security, accuracy, effectiveness, and performance.

G. Developers must ensure that GenAI undergoes continuous testing, checks, reviews, and maintenance to ensure that the GenAI is performing as expected.

H. Developers must identify and manage all risks associated with the GenAI tool, including those arising from unintended use.

I. Developers must ensure human oversight and thorough validation of all outputs and generated content, mainly to check for accuracy, bias, quality, duplication of response, and infringement of third-party intellectual property rights.

J. Developers must not rely on GenAll to implement security features. Regardless of source, all outputs must be thoroughly reviewed from a security perspective.
