Physical and Environmental Security Policy

From the Office of Chief Information Officer, State of Minnesota

Version: 1.7
Effective Date: 1/1/2016
Revised: 12/31/2024
Approved: John Israel, State Chief Information Security Officer **Date:** 3/20/2025

Policy Statement

The State of Minnesota must ensure that facilities used to store, process, or transmit State data have the appropriate physical and environmental controls in place to ensure the confidentiality, availability, and integrity of the data. Additionally, paper, and electronic media containing State data must be protected from unauthorized or unintended disclosure or destruction.

Employees must abide by the terms of this policy. Employees who violate this policy may be subject to discipline, up to and including discharge.

Reason for the Policy

Physical and environmental controls protect systems and data from unauthorized and unintended damage or disclosure and from unintended service outages.

Roles & Responsibilities

- Employees, Vendors, and Contractors
    - Be aware of and follow relevant information security policies, standards, and procedures. o Ensure information security is incorporated into processes and procedures.
    - Ensure contract language with contractors and vendors includes required information security controls.
    - Consult with information security staff on the purchase and procurement of information technology systems or services.
    - Contact information security staff or email GRC@state.mn.us with questions about the information security policies, standards, or procedures.

- Supervisors and Managers
    - Ensure employees and contractors are proficient in the information security policies, standards and procedures that are relevant to their role.
    - Hold employees accountable for following the information security policies, standards, and procedures.
- Information Technology Personnel
    - Apply appropriate controls to the design, operation and maintenance of systems, processes, and procedures in conformance with the information security policies, standards, and procedures.
- Information Security Personnel
    - Develop, maintain, and assess compliance with the information security policies, standards, and procedures.
    - Develop, maintain, and implement a comprehensive information security program.
    - Provide training on information security policies, standards, and procedures.
    - Assist agencies and personnel with understanding and implementing information security policies, standards, and procedures.
    - Notify appropriate personnel of applicable threats, vulnerabilities and risks to State data or systems.
- Agency Data Practices Personnel
    - Assist agencies and personnel with questions on proper data use, collection, storage, destruction, and disclosure.

Applicability

This policy applies to all departments, agencies, offices, councils, boards, commissions, and other entities in the executive branch of Minnesota State Government.
